

2017 Catalog

Visit our website!
BedillionHoneyFarm.com

No Bees, No Honey.

No Work, No Money.

We hope this catalog finds you well and excited about a new year of beekeeping!

It's been another busy & productive year. The youngest resident beekeeper-in-training has been putting in his hours in the bee yards, equipment barn & honey house. We're all looking forward once again to helping folks big and small in the wonderful endeavor of beekeeping.

We're happy to again offer "cooked & dipped" woodenware. The process of "frying" the wood in wax and gum rosin preserves the wood and gives it a water resistant coating. Water beads off and no further painting is necessary. The bees seem to enjoy it, too!

Take a look at the organic mite control offered on pg 10. This natural, gentle regimen of varroa control is a regular part of our hive management and has made a great difference in the health & hardiness of our bees.

Thanks for giving our catalog a look & if you have any questions or if there's something you're interested in that you don't see listed, give us a call or send an email. We'll do our best to get you what you need. We want you *and the bees* to be successful!

Let's make 2017 a great year of beekeeping!

Mark & Sara Bedillion

Woodenware

2

Where indicated, our woodenware is assembled, "cooked & dipped" in paraffin, beeswax & gum rosin for waterproofing & protection. No further painting or staining is necessary. Ready for the bee yard.

Heavy Duty Telescoping Lid

-Assembled, topped with .019 white aluminum, 3" wide skirt
10 Frame or 8 Frame..... \$21.00 (10+...\$19.00)

Migratory Lid

-Assembled & "Dipped", main portion tongue & groove with a lip on the ends to keep out water.....\$12.50

Inner Cover

-Assembled, standard raised panel style
10 Frame or 8 Frame.....\$10.00 (10+...\$9.00)

Solid Bottom Board

-Assembled & Dipped, standard reversible bottom board, (for undipped, subtract \$0.50)
10 Frame or 8 Frame.....\$16.50. (10+...\$15.00)

Deep Hive Body, 9 1/2",

-Assembled & "Dipped", Finger Joint Corners
10 Frame or 8 Frame.....\$20.00
-Assembled, not dipped.....\$18.00
-Unassembled.....\$16.50 (10+....\$15.00)

Medium Super, 6 5/8"

-Assembled & "Dipped", Finger Joint Corners
10 Frame or 8 Frame.....\$16.00
-Assembled, not dipped.....\$14.00
-Unassembled.....\$12.50 (10+.....\$11.00)

Shallow Super, 5 11/16"

-Assembled & "Dipped", Finger Joint Corners
10 Frame or 8 Frame.....\$14.00
-Assembled, not dipped.....\$13.00
-Unassembled.....\$11.50 (10+...\$10.00)

Screened Bottom Board with Mite Tray, 10 or 8 Frame

-Assembled, needs no other bottom board. Increases ventilation & allows for mite drop.....\$29.00 (10+...\$26.00)

Entrance Reducer

-Gives 3" entrance turned one way & 1" entrance turned the other way

**Strong
Microbials®**

**SuperDFM-
HONEYBEE**

UNIQUE & NATURAL
PROBIOTIC INGREDIENTS

SuperDFM-HoneyBee uses only natural active direct fed microbial ingredients scientifically selected for maximum benefits to promote intestinal wellbeing in honeybees, thus strengthening colonies. These ingredients are GRAS and are safe for bee consumption.

Probiotics are internationally recognized to have beneficial properties in both animal and human health. SuperDFM is a rich and nourishing viable probiotic supplement that promotes bees' intestinal comfort. SuperDFM-HoneyBee is 100% compliant with all American animal feed regulations.

Others uses for SuperDFM-HoneyBee:

- ✓ To reinvigorate bees underperforming, weak or not feeding
- ✓ Use during shipping to minimize gut stress
- ✓ Use when installing nucs.
- ✓ For new queen introduction
- ✓ For a cleaner healthier hive

A natural probiotic supplement of beneficial bacteria that naturally reside in the intestines of honey bees. Suppresses pathogens and increases levels of good bacteria for strong hive immunity and GI health. Helps in formation of fat bodies for better overwintering. 100grams, treats 10 hives.....\$20.00

Double Stainless Steel Sieve

2 parts, coarse strainer fits inside fine sieve.....\$35.00

EZ Strainer, fits a 5 gallon pail, 400 micron.....\$8.50

If there's something you're looking for that you don't see in this catalog, please ask. We may have it, and if not, we will do our very best to get it for you.

After 15 years in the farmers market business, we have closed down our seasonal store front in order to fully focus on farming our bees. We've been working towards this goal for several years and think it's going to result in even better bees and more local honey.

We will not have regular store hours. We will be available for beekeeping equipment and honey sales by appointment only. Please call ahead before stopping out to ensure we are here to help you.

Our bee yards are located throughout our county and out into neighboring counties, and the bees require our regular care and attention, so we will be on the road, but we will be happy to make time to meet you here at the farm for equipment or honey sales. Honey is bottled on a schedule, so please allow at least a day to get your order into the rotation.

HONEY

*pure From The
Hive*

"Come See The Bees!"
Prices effective 01/04/2015 & subject
to change

Raw, local honey from our hives in SW Pennsylvania. Unfiltered, unpasteurized, never heated above hive temperature, pure. Our hives are treated organically and without antibiotics. Our wildflower honey comes from varied seasonal nectar sources such as apple blossom, locust blossom, berry blossom, bull thistle, aster, Japanese knotweed, Autumn olive, goldenrod, and other local native floral sources. Hand-bottled here on our farm in small batches.

Keep synthetic chemicals and pesticides out of your hives!

Varroa destructor on drone larva

Heilyser Technology manufactures and distributes the JB200 Electric Oxalic Acid Vaporizer and Bee Tea feed supplement.

The Varroa Mite originated in Southeast Asia and is now found on every continent except Australia. Individual bees infested with Varroa are harmed in two ways - first, by loss of hemolymph, which in itself is serious, and second, by the puncture wound, which allows entry of infections and disease. Even in low infestations, bees suffer weight loss and shortened life.

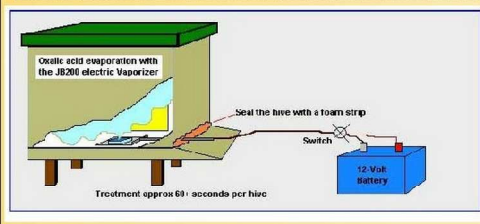

The sum effect on a colony infested with Varroa is that it is seriously harmed, and if no control measures are taken the colony will die.

We have been very pleased with the results of OA vaporization, in our hives. It is easy to use, natural & organic, and non-polluting. These treatments also have not been shown to promote resistance in the mites, a serious problem with synthetic pesticides.

Heilyser JB200 Electric Oxalic Acid Vaporizer

JB200 Vaporizer.....\$105.00

Vaporizer Kit -Vaporizer wired with in line switch & battery clip
\$140.00

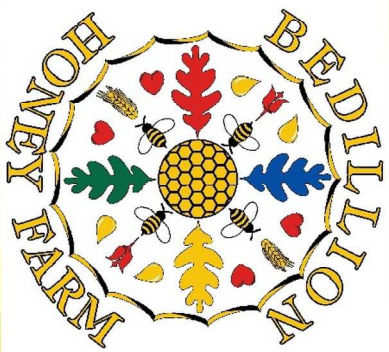

- Vaporizers come with a measuring scoop for the crystals and safety instructions
- **No delays in honey, beeswax and propolis production**
- **Very good bee compatibility**
- **High degree of effectiveness**
- **No early ageing of the bees**
(important to population of the bees in spring)
- **Very user-friendly for the beekeeper.**
Takes only about 1 or 2 min per colony
- **No oxalic acid resistance possible**
- **Pennies per treatment after initial investment**

"Here's some great photos starting from up close to the whole catch tray."

"Wow!! That was incredible....unbelievable mite drop over just one week's time. Vaporization worked like a charm and not one bee affected. In the war of mite eradication, vaporization is like a smart bomb for the colony...kills the mites dead and leaves the bees unharmed.....they're fine and none the worse for wear." -"a beekeeper from Eastern PA."
